

■ Square wire & Flat square wire

Fuji's square & flat square wire are well-known and reputed among many customers internationally. This specific wire has been developed by ourselves based on 40 years' experience in this field.

Because of the highest quality, the products are prevailed widely in the electronic components manufacturing (ex: Transformers, Coils, Relays, Micro Motors, Resistors and Condensers, etc).

Especially, the sharp edge preparation of this square wire is most suitable for the wrapping connection entwining magnet wire on the terminals.

Moreover, there are other merits, like parts' self-sustaining at the time of equipping printed bobbin, the strength-up of the terminal drawing force and others. In addition to these merits, the wire is wounded on reels, so it is suitable for use in the automated equipments.
